DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Robert R. Lech on March 29, 2005.
3. The application's specification and claims have been amended as follows:
 - In specification page 8, line 16, "presetrn" has been amended as – present--.
 - In specification page 8, line 16, "these these" has been amended as –these--.
 - In specification page 3, line 16, "of the component light beams and combine" has been amended as –of the reflected component light beams from the plurality of white cells--.
 - Claim 1, lines 12-13, "the component light beams and combine" has been amended as –the reflected component light beams from the plurality of while cells--.
 - Claim 8, line 14, "the component light beams and combine" has been amended as –the reflected component beams from the plurality of while cells--.

Reason For Allowance

4. Claims 1-13 are allowed.

Art Unit: 2873

5. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 8, which include a plurality of white cells, each white cell configured to receive at least one component light beam, each white cell further configured to propagate light at a specific duration; a second plurality of optical elements configured to receive each of the component light beams and combine the plurality of component light beams to form an output light beam.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Anderson et al. (US 6,724,951 B1) discloses a using fibers as shifting elements in optical interconnection devices based on the white cell in figure 1 comprising of field lenses, spherical lenses (A,B,E,F) and MEM device; however, Anderson et al. does not teach or suggest a combination in which a plurality of white cells, each white cell configured to receive at least one component light beam, each white cell further

configured to propagate light at a specific duration; a second plurality of optical elements configured to receive each of the reflected component light beams from the plurality of light beam of white cells and combine the plurality of component light beams to form an output light beam.
